Your Teen & After-School Activities

By [Ben E. Fitz](#)

📁 From art clubs to sports to language clubs, there are many after-school activities to choose from. Some parents may ask, “Are after-school activities important?” Studies show that teenagers who participate in extracurricular activities improve their well-being while increasing their opportunities in university and the job market. Here are three of the most important benefits of after-school activities.

Read the following written text:

Interpersonal relationships

When teens are part of a team, they meet a variety of new people with different mindsets. Interacting with a new group of people teaches teens how to cooperate and communicate well. Later these skills help teens to become more understanding leaders and citizens.

Mental health

Research shows that allowing teens to participate in extracurricular activities and sports can improve their mental health. In a 2020 study, Eva Oberle showed that participating in these kinds of activities lowers levels of depression, anxiety and stress amongst teens. Having great mental health increases levels of self-esteem and creates better educational opportunities.

Self-discovery

Teens who are involved in extracurricular activities can fully explore their interests. Through this exploration, teenagers learn more about themselves—what they like and where they belong. When a teen knows who they are, their confidence increases, and they can make better decisions about their future career. Overall, joining school clubs and participating in extracurricular activities will lead your teen to a brighter future.

Answer the following questions:

Question 3a (2 marks)

State two reasons why after-school activities are important.

Reason 1:

Reason 2:

Question 3b (2 marks)

Select the appropriate word that completes each gap in the following sentence.

Draggable items:
